

Frontend developer

Experience

2023.03 - ...

*Skillsetter,
Atlanta*

Front-end developer

Development and support of a platform for monitoring and optimizing the procurement process.
React, implementation of typescript, improving code quality, finding solutions for non-standard tasks.
Worked closely with designers and backend developers, which helped create convenient and intuitive interfaces for users.

2021.08 - 2023.01

Skillsetter, Kyiv

Front-end developer

Development of an educational platform, which includes landing pages, training courses, tasks with answer processing, etc. Transferring of existing functionality from twig to react, development of the new functionality to react, a layout both of html/sass and using style components, redesign. As the state manager was used React Context. A small amount of vanilla JS.

2019.09 - 2021.05

Easy Agency, Kyiv

Front-end developer

Creation and support of sites for clients. Support of a large legacy project on React. Several projects from scratch in which I was involved in development on react, development on vanilla JS, layout according to BEM methodology with svg graphics, animation, using schema.org semantic markup, and page loading optimization.

2017.08 - 2018.08

*Feng Shui Crazy
Journey, Kyiv*

Front-end developer

Maintenance of two large websites on WordPress. Layout, introduction of the version control system. Connecting and configuring various web services (form generators, timer, chats, comments, letter sending, etc.).
